Tom:

I wanted to drop you a short note to thank you, again, for all your help through our recent home repairs. Your technical support and services were responsive, professional, and thorough. However your advice, consulting, and general concern for the complete resolution of all our problems were truly above and beyond. We would have been hard pressed to unwind all the issues that we faced without your capable assistance.

I will enthusiastically recommend your services to anyone facing water intrusion issues, be they attributable to a sudden plumbing failure, foundation penetration, or roof leaks.

And in the future, we'll not buy a house without your assistance!

Thanks again for all your help, Tom.

Best regards,
